

If your current depression medication just isn't enough, consider the STEP-D study.

Our office is helping to evaluate an investigational medication as an add-on treatment to an approved anti-depressant medication. You may be able to take part in this STEP-D study if you:

- Are 18-65 years old
- Have been diagnosed with Major Depressive Disorder (MDD)
- Have been experiencing symptoms of depression for at least the past 2 months
- Have been taking at least one antidepressant medication as prescribed, but it is just not helping you enough

Study staff will review additional criteria with you at your first study clinic visit. The study lasts 15-22 weeks and all office visits, study-related medical and psychiatric evaluations, and study medications will be provided to participants at no cost.

For more about this MDD study, please contact:
